

# TruCount<sup>™</sup>

Fast, Accurate, Effortless Pill Counting

## Why Choose TruCount<sup>™</sup>?

### Efficiency

- Vision-based counting delivers instant results—counts accurately in seconds
- Ideal for:
  - Daily prescriptions
  - 90-day fills
  - Double-counting controlled meds
  - Avoiding expensive med overcounts
  - Automated dispensing canister replenishment
  - Inventory checks
- Eliminates slow, error-prone manual counting by 5's

### Workflow

- Plug-and-play simplicity, no calibration or IT setup needed
- Affordable tabletop solution for any volume pharmacy
- Compact footprint fits any pharmacy workstation

### Accuracy

- Advanced vision technology counts tablets and capsules precisely
- Prevents filling errors, over- and under-counts, and inventory record discrepancies

## The TruCount Process

Pour pills onto counting surface, see quantity instantly.

(If needed) add pills, or remove pills to get to needed quantity.

Use pill pods to transfer meds to patient vial or stock bottle.

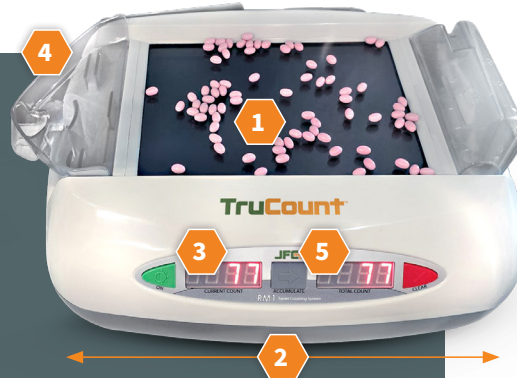

## TruCount Vision Technology

Using advanced vision-based recognition, TruCount accurately identifies and counts each tablet or capsule as it's poured onto the counting surface. No calibration, training or complex setup required.

**Perfect for any pharmacy counting need:** Prescription filling, inventory checks, automated dispensing canister replenishment, and controlled substance double-counts.

### Components

- 1 Counting Surface** – 8" x 6" area where tablets and capsules are poured
- 2 Small Footprint** – Fits any workstation or countertop
- 3 Digital Display** – Real-time count shown clearly
- 4 Spatula & Pods** – Includes spatula for easy pill handling, 2 pill pods, and an inventory hopper for seamless pill transfer
- 5 Accumulate Function** – Builds a running tally for high-volume counts, including physical inventory with large stock bottles and automated dispensing canisters

## TruCount™ Specifications

Dimensions	14" W x 12.1" D x 6" H
Weight	6 lbs
Counting Surface Area	8" W x 6" D
Includes	Spatula, 2 pill pods, and large count/inventory hopper

## Launch Adherence Packaging Program with TruPak™ Spark and TruCount

For pharmacies starting LTC@Home fulfillment, or servicing LTC facilities' packaging, the TruPak Spark is a compact, budget-friendly system to automate patients' daily medication doses in adherence-boosting strip packaging.

TruPak Spark is fully scalable, so you can manage PRNs, stat doses, mid-cycle changes, and adherence packaging daily doses—all within a small floor space and investment.

Pair your TruPak Spark with a TruCount device to achieve exact counting when loading the self-calibrating canisters before dispensing. For more about starting an adherence packaging program, talk with your JFCRx account director.
