

# TruPak<sup>™</sup> Spark

## Growth-Ready Adherence Pouch Packaging for Multi-Dose or Unit-Dose

### Why Choose TruPak<sup>™</sup> Spark?

Perfect for retail, long-term care, combo-shop, hospital, and hub-and-spoke pharmacies, TruPak Spark delivers flexibility where it matters most:

- ▶ **Launch Multi-Dose Adherence Packaging** – Start quickly without major footprint or cost, and expand into new markets like LTC@Home.
- ▶ **Simple Unit-Dose Packaging** – Fill for dispensing cabinets and unit-dose prepacking.
- ▶ **Redundancy Assurance** – Acts as a secondary system to keep production moving during maintenance or downtime.
- ▶ **Production Flexibility** – Handle PRNs, stat doses, and daily control orders outside cycle-fill.
- ▶ **Mid-Cycle Changes** – Manage adjustments, discontinuations, or new scripts without disrupting production.
- ▶ **Hub-and-Spoke Support** – Give your spoke pharmacy sites the power to run first fills, change orders, and short runs while the hub focuses on high-volume cycle fills.

### Universal Canister Technology: Smarter, Faster Filling

TruPak Spark's Universal Canister Technology makes medication loading simple and straightforward. Self-calibrating canisters eliminate the need for costly canister changes and storage space and reduce exception tray usage.

**Flexible Loading** – Patient's medications that are already calibrated are automatically assigned to a canister. Technicians scan the stock bottle's barcode, count the needed quantity, and load the medication into the canister.

**Self-Calibrating Technology** – Automatically adjusts to pills of varying shapes and sizes, eliminating the need for manual calibration and saving technician time and steps.

Unit-Dose

Or Multi-Dose

## TruPak™ Spark and Prep Station

- 1 8 Universal Canisters:** Guided workflows with self-calibrating canisters to handle virtually any tablet or capsule.
- 2 DTA LED Tray:** Light-guided cells ensure accurate filling of non-canister medications.
- 3 Two Packaging Options:** TruPak Spark is available as Multi-Dose (wide) or Unit-Dose (narrow).
- 4 Spark Prep Station:** Organize supplies, computing, and TruCount™ integration.
- 5 TruCount™ Tablet Counter:** Vision-based counting for fast, accurate canister filling.
- 6 Small Footprint:** TruPak and Prep Station require only 6.8 sq. ft.

## TruPak Spark Specifications
