

TruPakTM Spark

Growth-Ready Adherence Pouch Packaging

Why Choose TruPakTM Spark?

Perfect for retail, long-term care, combo-shop, and hub-and-spoke pharmacies, TruPak Spark delivers flexibility where it matters most:

- ▶ **Launch Adherence Packaging** – Start services quickly without major footprint or cost.
- ▶ **Expand into LTC Services** – Add adherence packaging for long-term care (LTC) facilities and LTC-at-home programs.
- ▶ **Redundancy Assurance** – Acts as a secondary system to keep production moving during maintenance or downtime.
- ▶ **Production Flexibility** – Handle PRNs, stat doses, and daily control orders outside cycle-fill.
- ▶ **Mid-Cycle Changes** – Manage adjustments, discontinuations, or new scripts without disrupting production.
- ▶ **Hub-and-Spoke Support** – Give your spoke pharmacy sites the power to run first fills, change orders, and short runs while the hub focuses on high-volume cycle fills.

Universal Canister Technology: Smarter, Faster Filling

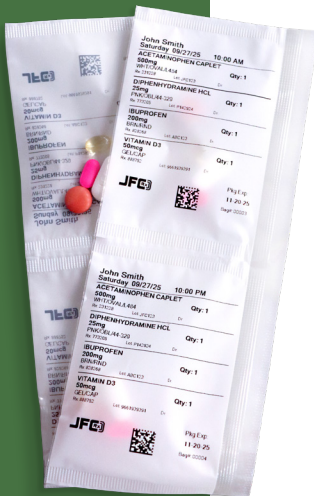

TruPak Spark's Universal Canister Technology makes medication loading simple and straightforward. Self-calibrating canisters eliminate the need for costly canister changes and storage space and reduce exception tray usage.

Flexible Loading – Each canister is registered to a patient's order and the required medication. Technicians simply scan the stock bottle's barcode, count the needed quantity, and load the medication into the canister.

Self-Calibrating Technology – Automatically adjusts to pills of varying shapes and sizes, eliminating the need for manual calibration and saving technician time and steps.

TruPak™ Spark and Prep Station

- 1 8 Universal Canisters:** Guided workflows with self-calibrating canisters to handle virtually any tablet or capsule.
- 2 DTA LED Tray:** Light-guided cells ensure accurate filling of non-canister medications.
- 3 Flexible Packaging:** Variable pouch size options.
- 4 Spark Prep Station:** Organize supplies, computing, and TruCount™ integration.
- 5 TruCount™ Tablet Counter:** Vision-based counting for fast, accurate canister filling.
- 6 Small Footprint:** TruPak and Prep Station require only 6.8 sq. ft.
