

Blister Card Packaging Without Compromise: One System for Multi-Dose and Unit-Dose

TruCard™ handles unit-dose and multi-dose blister card packaging with equal precision — so you never have to choose.

TruCard is the only premium, scalable blister card automation platform that supports both unit-dose and multi-dose packaging workflows — with the benefit of a built-in vision inspection system. It is the one system that allows pharmacies to grow their multi-dose adherence card production without sacrificing their unit-dose card output.

Unit-Dose Card

Multi-Dose Card

“Our dispensing volume isn’t yet high enough to require separate automation for unit-dose, but it’s also too high to comfortably hand-fill. TruCard is a great fit, it allows us to automate unit-dose filling until we increase our dispensing enough to justify a separate unit.”

Andrew Schleisman
PharmD, Kohll’s Rx

Whether you’re fulfilling individual unit-dose cards for skilled nursing or acute care, or growing a multi-dose adherence program, TruCard makes both formats practical and scalable.

Why Pharmacies Are Turning to TruCard

- ▶ Premium integrated vision inspection system
- ▶ Dramatically lowers your cost to fill and reduces pharmacist check time by up to 75%
- ▶ Can produce up to 40 fully filled and verified unit-dose or multi-dose blister cards per hour
- ▶ Scalable automation that grows with your pharmacy’s patient mix
