TruScript™

Easy, Safe, and Accurate Automated Vial Filling

Efficiency

- Ability to count multiple prescriptions simultaneously
- Ability to link multiple devices together to expand your formulary capacity
- Accommodates any size and type of vial to address customer preference

Workflow

- Ability to handle multiple location order routing for disaster recovery
- No rear access required for operation = easy pharmacy integration
- Intelligently routes scripts to dispense in sequence based on priority status
- Scalable design to fit any size pharmacy

Safety

- Auto-locking of drug canisters to control access and improve security
- No cross contamination – no compressed air – no complicated moving parts

1

TruScript interfaces with PIS to route prescriptions.

2

Medication is dispensed from a locked cassette into a secured chute.

3

Pharmacy staff scans the vial label and the chute illuminates, ensuring the correct fulfillment.

4

Medication is dispensed.

5

Same drug scripts intelligently queue so one counts and stages after the other.

6

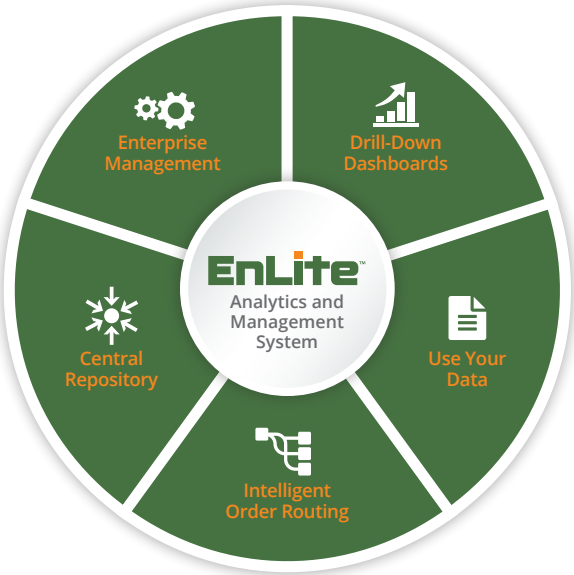
Software-enabled script prioritization for waiting customers.

TruScript™ Specifications

Dimensions	57" (w) x 12" (d) x 75" (h)
Weight	+/- 500 lbs
Power Supply	110 VAC
Number of Canisters	54
Capacity of Canisters	900cc

Maximize Your TruScript With Data-Driven EnLite™

By connecting your automation systems and operational data with our cloud-based EnLite ecosystem, your pharmacy can make informed decisions that improve your efficiency and profitability.



Enterprise Management

Whether you operate one or multiple TruScript systems, EnLite provides a single enterprise view, delivering instant insight into production and inventory.

Drill-Down Dashboarding

Bring your TruScript systems into one real-time dashboard, so you can drill down from big-picture views to granular detail instantly.

Use Your Data

Analyze pending orders to generate picklists and refill reports that keep canisters filled and production running without interruption.

Intelligent Order Routing

Orders are sent to the best-available device and rerouted instantly when capacity or conditions change.

Central Repository

Single drug database eliminates double-entry.

Streamline Workflow for Efficiency and Profitability

TruCard™

The industry's premier automated multi-dose and unit-dose blister card packager with built-in verification

Fills and checks blister cards automatically for efficient workflows

TruPak™

Labor-saving automated tablet pouch packaging

Improves safety, efficiency, and medication adherence
